

>>> Wine Cooler Models

Unique Tilted Wine Racks

Solid Door Models With Locks

Air Flow, Ensures Proper Wine Temperature of 53-57°F

Exterior Mounted Digital Thermometer

Operating at the ideal storage wine temperature of 53-57° F, our Wine Cooler models are specifically designed to encourage the storage and display of fine wine. Traulsen's unique wine racks control sedimentation by reducing vibration. This specially designed wine rack properly tilts bottles, keeping the corks moist and preventing bottle slippage. This also has the added benefit of allowing easy access to all bottles and positioning them for easy label viewing. You can trust Traulsen's quality Wine Cooler models to safely hold your fine wine at proper temperatures.
