

## Traulsen has been an ENERGY STAR® leader for years.

---

Traulsen has a full line of ENERGY STAR listed refrigerators, freezers, refrigerator-freezers, undercounter refrigeration systems and hot-food holding cabinets. In all, there are more than 100 ways for you to save energy and money with Traulsen.

> **Traulsen ENERGY STAR qualified R & A Series.**

If you're looking for ENERGY STAR qualified refrigerators, freezers, refrigerator-freezers and hot-food holding cabinets built to last a long, long time, then the R & A Series is for you. All R & A Series models have stainless steel exteriors. The R-Series also has stainless steel interiors, and the A-Series features anodized aluminum. Precise temperature control comes from Traulsen's exclusive INTELA-TRAUL® microprocessors. A two-year warranty on the INTELA-TRAUL microprocessor and a five-year warranty on the compressor demonstrate just how much confidence Traulsen has in the long, productive, energy-saving life of the R & A Series.

> **Traulsen G-Series refrigerators and freezers: A superior value.**

Every solid-door G-Series model is ENERGY STAR listed, which could save you up to 45% per year in energy costs. The G-Series includes an exclusive airflow system, which evenly distributes cool air throughout the cabinet to help keep food fresh and safe longer, while a microprocessor lets you control temperatures with digital precision.

> **ENERGY STAR goes undercounter.**

ENERGY STAR savings also come in a convenient undercounter size with Traulsen. In addition to the expected stainless steel construction (exterior), you'll also find a front-breathing design that allows for zero-clearance installation. Available in a variety of sizes, these undercounters will save you space and energy.
