NOTES

NOTE: Figures in parentheses reflect metric equivalents.

- 1= Area of standard shelf complement only, does not include storage area of additional shelves or available on each compartment bottom.
- 2= Note that single section models employ one evaporator coil and two compressors, data listed reflects total refrigerator/freezer system.
- 3= Based on a 90°F ambient and 20°F evaporator for the refrigerated section and a 90°F ambient and -20°F evaporator for the freezer section.
- 4= Based on a 90°F ambient and -20°F evaporator.
- 5= 12" Top clearance preferred for optimum performance and service access.

Refrigeration System - One Section Models

A top mounted, self-contained, balanced refrigeration system using environmentally friendly, non-flammable R-450A and R-448A refrigerants is conveniently located behind the one piece louver assembly. It features an easy to clean front facing condenser, thermostatic expansion valve, air-cooled hermetic compressor, and large, high humidity evaporator coils located outside the food zone.

A 9' cord and plug is provided standard. Standard operating temperatures are 34 to 38°F for the refrigerator compartment and 0 to -5°F for the freezer compartment.

Refrigeration System - Two & Three Section Models

A top mounted, self-contained, balanced refrigeration system using environmentally friendly, non-flammable R-450A and R-448A refrigerants is conveniently located behind the one piece louver assembly. It features an easy to clean front facing condenser, thermostatic expansion valve, air-cooled hermetic compressors, large, high humidity evaporator coil located outside the food zone and a top mounted non-electric condensate evaporator.

Rear biased return air duct protects against introduction of warm kitchen air, promoting even temperature maintenance and efficient operation.

A 9' cord and plug is provided standard on two section models. Standard operating temperatures are 34 to 38°F for the refrigerator compartment and 0 to -5°F for the freezer compartment.

Controller

Traulsen's Smart Control features advanced control algorithms and sophisticated diagnostic capabilities. Smart sensors will adapt the operation of the refrigeration system to a variety of environments and usage patterns. The Smart Control offers a complete set of visual alarms designed to alert the user to critical events. In the event of an alarm, a dedicated Alarm LED will illuminate, informing the user of the critical event and describing the event in the large, easy to read full text display.

Interior

Standard interior arrangements include three (3) coated wire shelves per section, mounted on shelf pins (one section models are supplied standard with two wire shelves). Shelves are full-width, and do not have any large gaps between them requiring the use of "bridge" or "junior shelves". Recommended load limit per shelf should not exceed 225 lbs. Optional tray slides may be purchased in combination with, or in lieu of these. Interior arrangements are installed at the factory and EZ-Change interior slides (only) are field installed.

Warranties

Both a three year parts and labor warranty and a five year compressor warranty (self-contained models only) are provided standard.
